

JenarkSecureSM

A reliable and easy way to backup critical business data

Hardware malfunctions, theft, and tragic disasters can all happen in a moment's notice—destroying business data you have spent years developing. In an information-driven world, it is critical to have a reliable plan for data protection. On a nightly basis, JenarkSecure uses the power of your internet service to backup your data in Jenark property management software and other office data from your various business servers' hard drives to the JenarkSecure Backup Data Center.

How valuable is your data to your business? Client transactional data, business proposals, email files and photos are valuable information that may be stored on hard drives on your business servers. On a pre-determined schedule, you can access the JenarkSecure Backup Data Center and validate your data has been transmitted and restored correctly—giving you the piece of mind in knowing that your business would survive an unforeseen disaster. Don't underestimate the value of your data—secure your business information with JenarkSecure!

Benefits

- ▶ Reduces risk and provides access to business information
- ▶ Provides a reliable and secure way to backup and protect your essential data
- ▶ Supplements traditional backup methods
- ▶ Eliminates computer down time and expense of losing your data

Features

- ▶ Quick recovery—your data is stored offsite and may be quickly retrieved with internet access
- ▶ Automated data storage—there is no manual staff involvement
- ▶ Continuous backup—JenarkSecure transmits your data nightly for all of the servers you are currently running

Take control and protect your data with JenarkSecure. Don't wait until it is too late! For more information, contact 888-711-3393 or marketing@jenark.com
